DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 12-27, and 31 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hansen.

Claims 1, 2, 12-27, and 31 correspond directly to claims 1, 2, and 7-23 of Hansen.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

Art Unit: 3744

3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-6, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen in view of Brendel.

Hansen does not teach the limitations recited in each of these claims.

As per claims 3 and 4, the Examiner notes that heating circuits using a condenser bypass are well-known in the art. Brendel teaches a transport refrigeration system comprising condenser bypass line 84. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the condenser bypass of Brendel within the system of Hansen for the purpose of achieving a desired heating capacity (see title/summary of Brendel).

As per claim 5, Brendel further teaches hot gas bypass line 84 bypassing expansion valve 28 (Figure 1).

As per claim 6, Brendel further teaches bypass valve 90.

As per claim 10, Brendel further teaches the mode being controlled by valve 90.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen.

As per claim 11, Hansen does not specifically state that the power requirement is defined by comparing desired temperature to the actual temperature of the transport volume. Official notice is taken that defining power requirements by comparing an actual temperature to a desired temperature is extremely common and well-known in the art of temperature controls and would have been obvious to one of ordinary skill in the art at the time the invention was made to apply to the system of Hansen for the purpose of degree of cooling required.

Allowable Subject Matter

Claims 7-9 and 28-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
